

## Table 1 Examples with Built-in R Datasets

zztable1

2026-02-18

```
library(zztable1)

# Create a sample dataset
set.seed(123)
trial_data <- data.frame(
  arm = factor(rep(c("Treatment", "Placebo"), each = 50)),
  age = rnorm(100, mean = 45, sd = 15),
  sex = factor(sample(c("Male", "Female"), 100, replace = TRUE)),
  bmi = rnorm(100, mean = 26, sd = 5)
)

# Create a basic summary table
# zztable1::table1(form = arm ~ age + sex + bmi, data = trial_data)
table1(form = arm ~ age + sex + bmi, data = trial_data)
```

Table1 Blueprint (5 × 4) Formula: arm ~ age + sex + bmi Theme: Console Populated: 0/20 (0%)
